

INSTALLING ADJUSTABLE CLEAT BOW SECURING SYSTEM

NO TOOLS ARE REQUIRED.

YOUR NEW FREEDOM 4000 BOW TRANSPORT CASE BY SKB FEATURES A COMPLETELY RE-POSITIONABLE CLEAT STRAP-DOWN SECURING SYSTEM. YOU WILL FIND TWO CLEAT SIZES WITH YOUR CASE, THE WIDER CLEATS (B) SECURE YOUR RISERS WHILE THE MORE NARROW CLEATS (A) ACCOMMODATE THE LIMBS. POSITION YOUR BOW AS SHOWN IN THE PHOTO AND SECURE IT USING TWO OF EACH SIZE CLEAT. THE BOTTOM OF THE CLEATS WILL AFFIX TO THE BASE OR LID OF THE CASE USING 'HOOK AND LOOP' TECHNOLOGY. THEY CAN BE EASILY RE-POSITIONED OR ADJUSTED FOR BETTER FIT. FINISH THE INSTALLATION BY PULLING THE RED STRAPS THROUGH THE RING AND FASTENING SNUGLY.

RE-POSITIONABLE ARROW HOLDERS ARE ALSO PROVIDED. POSITION THESE AS SHOWN, ADJUSTING TO ACCOMMODATE YOUR PARTICULAR BOW DESIGN.

THE SAME ARRANGEMENT CAN BE INSTALLED IN THE LID OF YOUR CASE. BE EXTREMELY CAREFUL POSITIONING TWO BOWS SO THAT CLOSING THE CASE COMPLETELY DOESN'T CAUSE BOWS TO CONTACT EACH OTHER.
